

Accredited Pension Actuary

- » Execution of the statutory tasks according to art. 52e BVG/LPP
- » Clear and comprehensible analysis of your pension fund
- » Early recognition of critical aspects and any need for action

Your pension fund's financial security is the centre of our expert activity. Our profound knowledge in actuarial theory and practice, continuous exchange with supervisory authorities as well as active engagement in expert panels and education allow us to support you in the best possible way.

Statutory tasks

Confirmation of the financial security and legal compliance of plan rules

Assessment

Dynamic valuation of liabilities and determination of the necessary reserves

Reporting

Transparent, periodic report and customised "cockpit" with key figures relevant to the management

Legal support

Answers to legal questions and proactive information about regulatory changes

Interactive consulting

Real-time on-site analysis thanks to a customised and interactive analysis software

Analysis and simulations

Actuarial gain and loss analysis, simulation regarding distribution and restructuring measures, funding ration development and numerous additional key figures
