

Consulting on Private Markets

- » Advice on investments in private equity, private debt and infrastructure
- » Continuous investment planning
- » Extensive performance analysis platform

Private markets significantly expand the investment universe for institutional investors, but they come with challenges. We not only support you in evaluating your private markets strategy, but also have extensive market knowledge regarding the implementation. Our proprietary platform for analysing the performance of private market investments is science-based and allows for a performance assessment that takes into account cash flows, market developments, cost structure and portfolio risk.

Strategic consulting

Assessment of the illiquidity risk and the illiquidity premium as well as determination of suitable bandwidths and benchmarks.

Legal Advice

Identification and, if possible, elimination of legal risks such as BVV 2 compliance, for example by drafting a side letter.

Investment planning

Support in portfolio structuring and continuous investment planning (e.g. over-commitment strategy).

Extensive analysis platform

In-depth performance analysis compared to listed investments (public market equivalent).

Asset manager selection

Systematic selection of products based on objective and client-specific criteria.

Know-how and market knowledge

We are a leading investment consultant in Europe and provide high-level consulting services thanks to our highly qualified staff.
