

# Sustainable Investments

- » Support with ESG reporting and communication
- » Professional and efficiently implementable sustainability concepts
- » Independent assessment of sustainable investment solutions

We support you throughout the entire investment process in all questions related to sustainability, for example with general or specific workshops on sustainability, the development of sustainability principles, the incorporation of sustainability aspects in the existing governance concept or investment strategy, the selection and mandating of sustainable asset managers or with individual investment controlling solutions and sustainability reportings.

## ESG\* analysis

Screening of all products or mandates of the portfolio with regard to existing sustainability aspects

## Client-specific strategies

Sustainability strategies based on the client's individual situation and specific requirements

## Investment Controlling

Continuous monitoring of sustainability criteria and the effect on return and risk as well as the environment and society

## Sustainability report

Support in communicating sustainability aspects to third parties, for example in the form of a sustainability report

## Current information

Continuous support based on the latest developments in sustainability

## Science-based analyses

Analyses of the opportunities and risks in the implementation of ESG approaches (impact on portfolio, return, risk, costs, etc.)

## Peer group comparisons

Extensive market overview and comparisons thanks to our broad client basis and many years of experience

## Independence

Guarantee of independent assessment and consulting in the implementation of sustainability strategies and the selection of asset managers
